SmartBunker® has a unique easy to operate dispensing mechanism. Simply place bucket inside, then pull handle downwards to release the salt & grit. Very little force is required. As you let go, the handle returns automatically and flow into the bucket stops. SmartBunker® can be packed down into a very small space for transportation. SmartBunker® can be easily carried through a standard doorway in its packed form - this allows it to be used even in places with limited access. SmartBunker® is suitable for indoor or outdoor use.

1. SmartBunker® stores your salt & grit at a high level for the following reasons:
 - This makes re-fills very easy from shoulder height.
 - Fully Waterproof + First in first out rotation system prevents both rainwater & condensation causing moisture ingress into salt & grit.
2. Capacity up to 200kg depending on the density of de-icer used.
3. SmartBunker® is easy to assemble in less than 5 minutes.
4. SmartBunker® has a unique inner chute, suitable for use with a typical bucket.
5. SmartBunker® has been designed carefully for excellent stability and resistance to tipping. Additionally, 4 holes are incorporated into the base. This gives the user an option to bolt the base rigidly to the ground. This is provided for instances where there is a perceived risk of very strong winds, vandalism, theft etc.
6. Key Lockable Lid, keys supplied.
