Stores up to 200kg - *keeping pellets moisture free and dry*

www.thesmartbunker.co.uk

SmartBunker® has a unique easy to operate dispensing mechanism. Simply place bucket inside, then pull handle downwards to release the wood pellets. Very little force is required. As you let go, the handle returns automatically and flow into the bucket stops. SmartBunker® can be packed down into a very small space for transportation. SmartBunker® can be easily carried through a standard doorway in its packed form - this allows it to be used even in places with limited access. SmartBunker® is suitable for indoor or outdoor use.

1. SmartBunker® stores your wood pellets at a high level for the following reasons:
 - This makes re-fills very easy from shoulder height.
 - Fully Waterproof + First in first out rotation system prevents both rainwater & condensation causing moisture ingress into wood pellets.
2. Capacity up to 200kg depending on the density of the fuel used.
3. SmartBunker® is easy to assemble in less than 5 minutes.
4. SmartBunker® has a unique inner chute suitable for use with a typical bucket.
5. SmartBunker® has been designed carefully for excellent stability and resistance to tipping. Additionally, 4 holes are incorporated into the base. This gives the user an option to bolt the base rigidly to the ground.
6. Key Lockable Lid, keys supplied.
